BARDAHL DIESEL SYSTEM CLEANER

One Tank Clean-up for injectors in modern CRDI systems to restore power and performance.

THE PROBLEM

The new electronically controlled high-pressure common rail direct injection systems (CRDI) have smaller and more precise nozzle tip holes and operate at higher pressures and temperatures making them more prone to deposit formation. These deposits disrupt the spray pattern causing inefficient fuel dispersion, poor combustion, and diminished performance.

THE SOLUTION

BARDAHL Diesel System Cleaner is an ultra-concentrated formula that uses advanced deposit control technology which was specifically developed for modern computer-controlled and common rail diesel injection systems. This solution also works very effectively in all other diesel engines and removes deposits caused by Biodiesel fuels.

THE BENEFITS

- A 'one tank' additive that thoroughly cleans a CRDI system
- Improves fuel economy & reduces operating cost
- Removes harmful external & internal deposits (IDID)
- Repairs the spray pattern and increases fuel flow rate
- Rigorously tested using CEC DW10 methodology to confirm results
- Restores lost power, enhances performance, decreases emissions
- Reduces fuel system coking, including contamination caused by Biodiesel fuels

DIRECTIONS

Add one bottle of **BARDAHL Diesel System Cleaner** to the tank prior to a fill-up. One 5 oz. bottle will treat up to 16gal./60 liters of diesel fuel. Use at every oil change or as needed to clean injectors and restore performance. Dispose of any used or unused solution in accordance with local, state, and federal regulations.

Product Specifications

Product #	3313
Unit UPC#	0 76906 03313 8
Case UPC#	30076906033139
Pack Size	12x5oz (148 mL)
Dimensions	L x 9.5" W x 5.5" H 8.5"
Weight & Cubic ft ³	4.7 lbs / 0.26 ft ³
Color	Dark Amber
Specific Gravity	0.870
Viscosity	N/A
Flash Point	>141°F / >60.5°C
