## **BARDAHL** **ENGINE STOP-LEAK**

Cost effective and efficient solution to repair engine oil leaks.

### **THE PROBLEM**

Over time, many vehicles tend to develop engine oil leaks. Extended exposure to high temperatures and long oil drains can cause the seals and gaskets to shrink and lose their pliability. If left untreated, these leaks can expand, reducing the oil level and potentially damaging the engine.

### **THE SOLUTION**

**BARDAHL Engine Stop Leak** is a proprietary formula that rejuvenates the seals and gaskets to restore proper function while the vehicle is in operation. **Engine Stop Leak** has special seal swell and conditioning agents that gently soften and expand these components to stop existing leaks and prevent future problems from occurring.

### **THE BENEFITS**

- Eliminates engine oil leaks while driving
- Helps prevent future oil leaks and costly repairs
- Reduces oil consumption due to leaks
- Extends the life of the vehicle
- Conditions and revitalizes all types of rubber and synthetic seals swell

### **DIRECTIONS**

Add one bottle of **BARDAHL Engine Stop Leak** to the crankcase of the engine. Do not overfill. The solution will work while the vehicle is being driven and best results are achieved after several hundred miles. One bottle treats up to 5 quarts and is compatible with all types of oil, including synthetics. Dispose of any used or unused solution in accordance with the local, state and federal regulations.

### **Product Specifications**

Product #	6015
Unit UPC#	0 76906 6015 8
Case UPC#	30076906060159
Pack Size	12x16oz (473 mL)
Dimensions	L x 11" W x 8" H 8.25"
Weight & Cubic ft <sup>3</sup>	12.8 lbs / 0.54 ft <sup>3</sup>
Color	Dark Red
Specific Gravity	0.880
Viscosity	6.0 cSt @ 100°C
Flash Point	>356°F / >180°C
