

THE ADDITIVE

Innovative Technology and Commitment to Quality

May 2016

Since its inception, Bardahl has followed the philosophy of its founder, Ole Bardahl, of only producing the highest quality products by constantly improving its proprietary formulations and providing innovative “solutions” to the marketplace.

The Bardahl commitment to innovative technology through research was founded from the very beginning with its first oil additive product that used a unique formulation to reduce friction.

“If we can’t make the best chemicals in the world, we won’t make any at all.”

Ole Bardahl
Company Founder

This technology was further developed with a Polar Attraction Formula that improved the anti-wear, anti-friction, and extreme pressure properties of motor oils.

Bardahl has built its leading worldwide reputation by maintaining the highest quality standards to produce the finest specialty lubricants, additives, and automotive service chemicals in the industry.

Bardahl is constantly developing technically advanced products for OEMs, professional technicians, and consumers that enhance vehicle performance.

Scientific research is continuously being conducted by chemists at the company’s state-of-the art laboratory.

All products are tested according to the standards established by the Society of Automotive Engineers (SAE), American Society for Testing and Materials (ASTM International), and other associations.

From formulation to production, Bardahl uses advanced technology and strict quality control procedures to ensure every product meets or exceeds its defined specifications.

This process enables Bardahl to develop unique formulations and technological advancements to meet the demands of today’s hi-tech vehicles, while maintaining compliance with environmental standards and regulations.

The R&D Team constantly evaluates the market to develop innovative products and recently designed “ultra-concentrated” formulations with smaller volumes of chemical solutions that perform at higher levels of effectiveness for less cost.

Bardahl – Innovative products designed to exacting standards that you can trust!
